DroneView Technologies

Bloomfield Hills, MI

Sales and Marketing Intern

May – August 2017

- Evaluated all internal processes regarding creation of flight plans, QA/QC of Ground Control Points and new contact creation in CRM; leading to more efficient guidelines for conducting and completing tasks
- Assisted in gathering data as well as conducting outbound sales calls in order to grow business contacts; resulting in multiple contracts and partnerships with clients
- Created CSV Parser Program to assist in MailChimp contact upload process. Used CRM export of contacts along with program to concatenate contact tags resulting in quicker and easier uploading

University of Michigan

Ann Arbor, MI

Teachers Assistant, Bio 173 Lab

January - April 2016

- Served as a teaching assistant in a microbiology lab and supervised students as they conducted experiments in order to enhance their comprehension of the material; resulting in research data used by the University in discovering new information about the effects of fiber on the gut microbiome
- Assisted two professors by analyzing dietary fiber and amylase concentration in different students' microbiomes; led to better understanding of the role the microbiome plays in producing carbon dioxide

University of Michigan

Ann Arbor, MI

Director of Content: MPowered Entrepreneurship

September 2016 - January 2018

- Lead a team of 8 people to expose students to the Entrepreneurial ecosystem of Ann Arbor and the University of Michigan
- Conducted the use of marketing strategies through the creation of content; exposing students to events and speakers related to entrepreneurship
